Introduction

Every champion needs a helping hand when things get serious. The Cornerman CM-133 was designed to conveniently create and restore backups from your EP-133 K.O. II so you can focus on being creative and work on your ideas when inspiration strikes.

Disclaimer

Use the app at your own risk. Delta Seven Kft. cannot be held responsible for any damage occurring while using the app. Although we are doing extensive testing with our own units and with our testers there's always a possibility of something going wrong.

Drum Machine Funk is not affiliated with Teenage Engineering. We are an independent team of creatives providing creative tools to music lovers to unlock the full potential of amazing music hardware.

Connection

Connect your EP-133 with an USB-C cable to your mobile device.

Due to the EP-133 always drawing power when connected over a USB-C connection only mobile devices capable of providing the needed amperage will work with the EP-133.

In practical terms these include:
- iPhone devices with USB-C port
- iPad devices with the USB-C port
- Android devices with USB-C port
